SHUBHAM MADANE

Full-Stack Web Developer | BE Computer Engineering (3rd Year)

Ravet, Pune | +91 8669386093 | madaneshubham853@gmail.com

GitHub | LinkedIn | Portfolio | LeetCode

CAREER OBJECTIVE

Dedicated third-year Computer Engineering student with practical experience in full-stack web development and applied machine learning / computer vision projects. Skilled in building responsive, scalable web applications using Firebase, Flask, SQL, and Supabase. Seeking an internship opportunity to apply technical skills and gain industry exposure.

EDUCATION

BE in Computer Engineering

Pimpri Chinchwad College of Engineering and Research, Ravet, Pune | Expected Graduation: 2028

SKILLS

Languages: Java, Python, JavaScript, PHP, C/C++

Frontend: HTML5/CSS3, Responsive Design, DOM Manipulation, Bootstrap

Backend: Firebase, Python Flask, Supabase, REST APIs

Database: MySQL/SQL, Firestore, MongoDB, SQLite

Tools: Git & GitHub, VS Code, XAMPP, Postman

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management, Quick Learner

PROJECTS

Expense Tracker | github.com/shubham5177/Expense-Tracker

HTML, CSS, JavaScript, Python Flask, SQL

- Built full-stack expense management system end-to-end
- Developed RESTful backend APIs using Python Flask
- Integrated SQL database with dynamic expense dashboard

Carbon Footprint Tracker | github.com/shubham5177/Carbon.FootPrint.Tracker

HTML, CSS, JavaScript, Supabase

- Built web app to calculate and visualize carbon emissions
- Integrated Supabase backend with authentication system
- Implemented real-time tracking and emission history logs

Smart Attendance System (ML Project) | github.com/shubham5177/SmartAttendance

Python, Flask, OpenCV, NumPy, HTML, CSS, JavaScript, Bootstrap 5, Chart.js, SQLite3

- Built ML/computer-vision based attendance system using face recognition
- Developed real-time dashboard with live charts, CRUD employee management, and CSV export

AI-Based Offline Exam Cheating Detection System | github.com/shubham5177/Exam-Proctor-System

Python, Flask, OpenCV, YOLOv8, MediaPipe, Bootstrap 5, SQLite

- Built single-camera AI exam proctoring system with student detection and tracking (YOLOv8)
- Implemented rule-based suspicion scoring with live dashboard, incident logging, and PDF reports

Gesture Volume Control | github.com/shubham5177/Hand-gesture

Python, OpenCV, MediaPipe, PyAutoGUI, PyCAW

- Built real-time hand tracking app to control system volume using pinch gestures

Invisible Cloak | github.com/shubham5177/Invisible-Cloak

Python, OpenCV, Tkinter

- Built real-time computer vision app simulating invisibility using HSV-based cloak detection
